

CONTENTS

About the Author	vii
Introduction	xiii
Chapter 1. Warning! Arc Flash Hazard.	1
What is an Arc Flash?	1
Burn Injuries	3
Chapter 2. Codes and Standards	9
Who Says I Have to Perform the Study?	9
OSHA CFR Title 29	12
NFPA 70E—Standard for Electrical Safety in the Workplace	17
Shock Hazard Analysis	22
Arc Flash Warning Labels	25
NFPA 70 National Electrical Code	27
Many Standards Define the Arc Flash Study and Protection Requirements	28
Chapter 3. What is an Arc-Flash Hazard Calculation Study?	31
What is an Arc-Flash Hazard Calculation Study?	31
Why Perform the Arc-Flash Hazard Calculation Study?	32
Calculation Methods	33
The Study Process	34
Chapter 4. Data Collection	41
Where Do I begin?	41
PPE To Wear During Data Collection	42
Single Line Diagrams	43
Jump Start the Project	44
Source Data	45
Impedance Data	53
Protective Device Data	58
Arc Flash Study Parameters	64
Type of Equipment	64
Data Assumptions	65

Equipment Condition and Maintenance	66
Chapter 5. Single Line Diagram	67
Developing the Single Line Diagram	67
Operating Scenarios	69
Chapter 6. System Modeling	71
System Modeling	71
Comparison of Scenarios—Does the PPE Level Change?	79
Chapter 7. Bolted Short Circuit Current	81
What is a Short Circuit?	81
Short Circuit Study—Bolted Short Circuit Current	84
Simplified “Infinite Bus” Short Circuit Calculation	86
Comparison of Transformer kVA Rating and Short Circuit Current	88
Effect of the Source Impedance	90
Effect of the Conductors	94
Short Circuit Motor Contribution	94
Chapter 8. Arcing Short Circuit Current	97
Arcing Short Circuit vs. Bolted Short Circuit	97
Arcing Short Circuit Current Calculations	98
Arcing Short Circuit Calculations $\leq 1\text{ kV}$	100
Chapter 9. Arc Flash Duration and Time Current Curves	111
Duration of Arc Flash Exposure	111
Factors Affecting Arc Flash Duration	112
Time Current Curves	114
Selective Coordination and Maintenance Settings	122
Transformer Secondary Blind Spot and Danger Areas	122
Overcurrent Device Age and Condition	124
Device Setting or Rating Changes	124
100% vs. 85% of Arcing Current	125
Chapter 10. Incident Energy Calculations	127
Incident Energy	127
Incident Energy Calculations $\leq 15\text{ kV}$ Three Phase	129
Incident Energy Calculations $> 15\text{ kV}$	142
Current Limiting Devices	143
Clearing Time is Everything	143
Chapter 11. Arc Flash Protection Boundary	145
Arc Flash Protection Boundary	145
IEEE 1584 Arc Flash Protection Boundary $< 15\text{ kV}$	152
Arc Flash Protection Boundary $> 15\text{ kV}$	156
Using AFPB Equations to determine the safe working distance for PPE with a lower arc rating	157
Keeping Unprotected People Away	158
Keep it Simple! Standardized Arc Flash Protection Boundaries	159

Chapter 12. DC Arc Flash Calculations	161
Arc Flash is not Just an AC Problem	161
DC Arc Flash Calculations	161
DC Arc Flash Modeling	162
DC Arc Resistance Worksheet	164
Power and Energy in the Arc	167
DC Arc Flash in Open Air	168
DC Arc Flash in an Enclosure / Box	170
What's Next?	172
Chapter 13. Arc-Rated Clothing and Personal Protective Equipment	173
Arc-Rated Clothing and PPE Selection	173
OSHA AR Clothing and PPE Requirements	174
NFPA 70E– AR Clothing and PPE Requirements	175
Method One—Incident Energy Analysis	176
Hazard/Risk Category Classification Table—	
Alternative to the Arc-Flash Hazard Calculation Study	178
NESC Arc-Rated Clothing and PPE Requirements	184
Incident Energy Greater Than 40 cal/cm ²	187
Arc-Rated Clothing	188
Personal Protective Equipment	190
What's Next?	192
Chapter 14. Arc Flash Warning Labels	193
Arc Flash Warning Label	193
What Information is required on the label?	194
Which Equipment requires a label?	196
What Colors and Signal Words are required?	197
Where are the Labels Located?	198
Labeling Multi-Section Equipment	199
Chapter 15. Solutions	201
Recommendations to Reduce Incident Energy	201
Protective Device Setting Changes to Reduce the Arc Flash Hazard	202
Protection Schemes to Reduce the Arc Flash Hazard	207
The Best Method	215
Chapter 16. The Arc-Flash Hazard Calculation Study Report	217
Put it in Writing	217
The Detailed Report	218
There WILL be Changes!	222
Get Everyone On Board!	222

Chapter 17. Integrating the Results into the Electrical Safety Program 223
 Arc Flash and the Electrical Safety Program223
 How to Recognize the Arc Flash Hazard224
 Arc Flash Protection Boundary224
 Selection of Arc-Rated Clothing and PPE based on AFHCS Results226
 Use of Arc Flash Warning Labels228
 Electrically Safe Work Condition229
 Energized Electrical Work Permit230
 Arc Flash and Electrical Safety Training232
 Finally232

Chapter 18. The Final Word—Can it Happen to Me? 233
 I am careful—It can’t happen to me!233
 Strange Statistics from My Arc Flash Training234
 The Final Word—Don’t Become a Statistic!236
